

Tile Accessory Mount used in a conduit application.

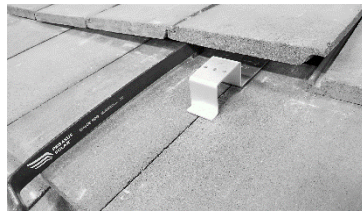

Junction Box mounted on a Tile Accessory Mount using the Pegasus Junction Box Bracket Attachment (RLUJB00AM00B-12).

Pegasus Solar's Tile Accessory Mount features a no-hardware installation and serves as a platform for conduit and junction box applications.

- Install by attaching over top of tile
- Designed for conduit or junction box installations
- Pre-drilled sites on mount for self-tapping screws or use included hardware (1/4" SS bolt & nut)
- Compatible with Pegasus Junction Box Bracket Attachment (RLUJB00AM00B-12)
- For use with all types of tile
- Aluminum Mill Finish
- Comes in Boxes of 6 with 6 sets of SS 1/4" Hardware

1. Find location for mount and lift adjacent tiles to expose the top of the tile intended for the mount. Tile removal is not required.

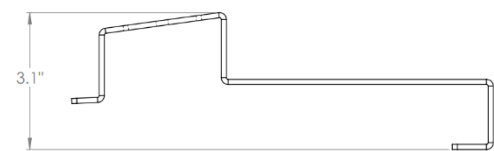

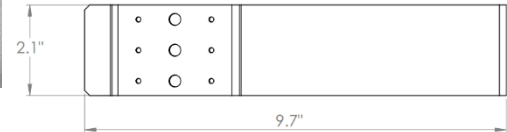

2. Insert mount between lifted tile and lower tile. Maneuver mount to ensure the "hooked" end of the mount is engaged with the top of the tile.

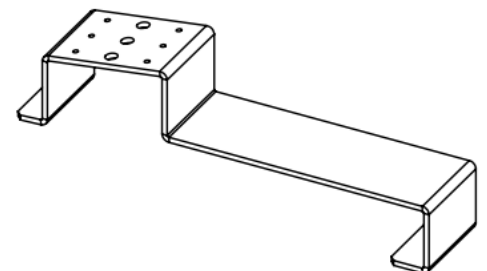

3. Lower lifted tile and adjust adjacent tiles if any tile spacing has been disturbed by the installation.

4. Use self-tapper screws or included hardware to mount conduit straps or junction box bracket. Refer to the NEC for required conduit spacing.

Specifications	Tile Accessory Mount
Compatible Tile	All
Install Application	Junction Box, Conduit
Tools Required For Install	None
Hardware Included	1/4" SS Nut/Bolt
